

ABSTRACT

5 A method for using one or more inflatable three-dimensional humanoid figures
for use in background scenes associated with still photography, motion pictures
and video productions which are low in cost, lightweight, easy to use, easy to
store, easy to transport and provides a greater range of viewing angles. It is also
envisioned that this invention can be used for corporate conventions requiring the
illusion of a large number of participants, in advertising and other functions where
the illusion of large numbers of people enhance the overall objective of the
10 functions.
